PRODUCT INFORMATION

KNEE FLARED EDGE COATED WEDGE SUPPORT

PPFP-PCAJ

The Knee Flared Edge Coated Wedge Support provides angled support for positioning the knees during medical imaging and other clinical procedures. Measuring 21″ L × 20″ W × 8″ H, its 26 degree wedge design helps support and stabilize the knees during positioning.

For added durability, a medical-grade, fluid-resistant coating covers the foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioner is radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design uses flared edges to significantly reduce artifacts during X-ray imaging. Although the flared sides increase the overall size, they do not affect imaging or positioning.

Finally, the Knee Flared Edge Coated Wedge Support is MRI Safe and latex-free. This makes it suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: 80 oz

SHIPPING DIMENSIONS: 26 × 24 × 9 in

PRODUCT DIMENSIONS: 21" L × 20" W × 8" H

MATERIAL: Coated Foam

POSITIONER TYPE: Extremity Positioners

FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
