PRODUCT INFORMATION

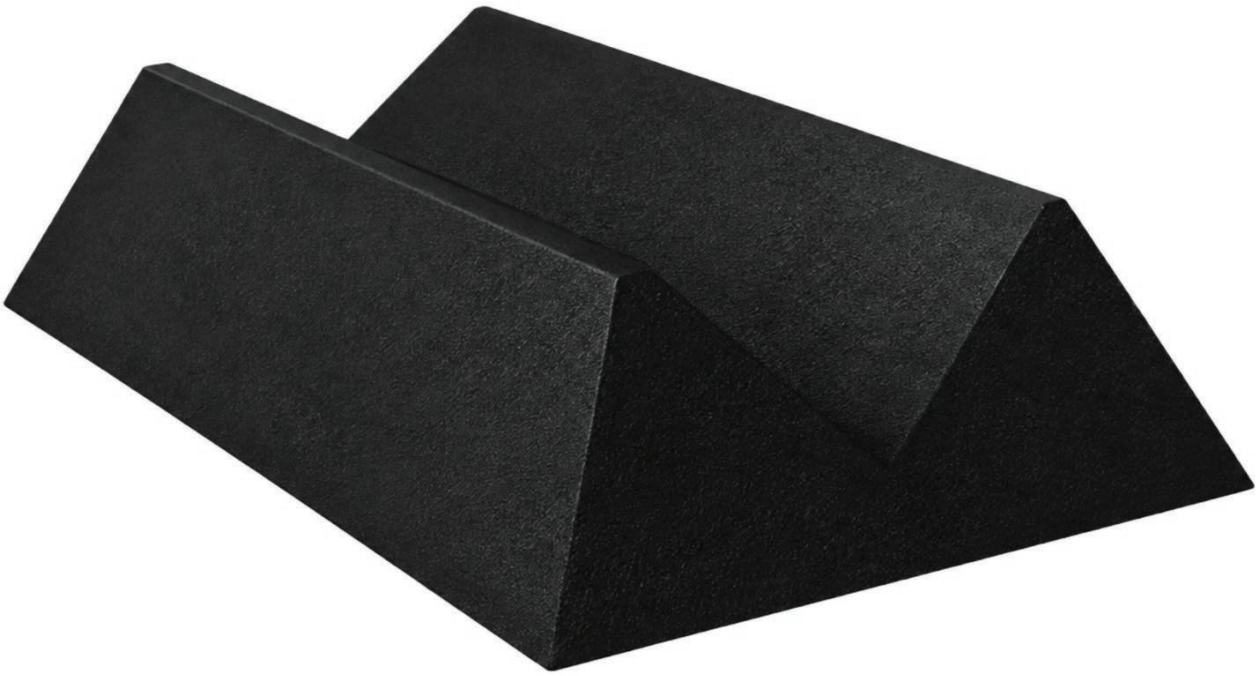
FLARED EDGE COATED EXTREMITY BLOCK

PPFP-PCCA | PPFP-PCCB



The Flared Edge Coated Extremity Block provides support for positioning the extremities during medical imaging procedures. Its contoured design helps support and stabilize the extremity during positioning. It is available in two sizes:

- **Small:** 12.5″ L × 7″ W × 3″ H
- **Medium:** 19.75″ L × 11.5″ W × 5″ H

For added durability, a medical-grade, fluid-resistant coating covers the foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioner is radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design uses flared edges to significantly reduce artifacts during X-ray imaging. Although the flared sides increase the overall size, they do not affect imaging or positioning.

Finally, the Flared Edge Coated Extremity Block is MRI Safe and latex-free. This makes it suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: Multiple options

SHIPPING DIMENSIONS: Multiple options

AVAILABLE SIZES: Small and Medium

MATERIAL: Coated Foam

POSITIONER TYPE: Extremity Positioners

FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
