graham field™

Everest & Jennings® by graham-field

Value:

Graham-Field is known for a broad product offering at affordable pricing, without sacrifice to quality. Like you, we understand that the cost of a product is more than a price tag. The cost also includes the time and effort required to sell to and service your customers. At Graham-Field we are proud to offer the value found in the Everest & Jennings® line of wheelchairs.

Quality:

The E&J™ name has been synonymous with quality manual folding wheelchairs since 1933. In a time when many manufacturers are producing products at the lowest possible cost, often cutting corners on quality, Graham-Field is standing by its dedication to quality through product design, specification control, testing and inspection. It is easy to see why the E&J Traveler® name is synonymous with quality.

Service:

Our products are often only a day away with centralized distribution located in the metro areas of Atlanta, Georgia; St. Louis, Missouri; and Los Angeles, California. Graham-Field also carries a full line of E&J parts and upholstery to meet your service needs. In addition, our customer service department and technical service teams are always ready to help with your product needs.
