Recommended Cleaners & Disinfectants

OAKWORKS®

NOTE: Reference the Cleaning Process section in the Product Manuals for further instruction.

Cleaning and disinfecting an OAKWORKS product is a three part process.

1. Clean any visible soil off the surface.
2. Disinfect surface per manufacturer's recommended contact time.
3. Rinse off disinfectant with clean water and throughly dry with a clean cloth or towel.

RECOMMENDED:

Oakworks recommends the use of disposable "paper roll" over the exam table/chair.

RECOMMENDED CLEANERS: For Ultraleather® Fabric

To maintain the beauty and longevity of your Ultraleather upholstery, we recommend using only approved cleaners and disinfectants.

For a full list of tested and approved products, please visit the Ultrafabrics Care & Cleaning Guide.

Note: All cleaners and disinfectants have the ability to degrade and damage the upholstery. This information is not a guarantee, however, following the recommended cleaner and disinfectant list and cleaning process will provided the best care for your OAKWORKS products. The use of other cleaning agents or disinfectants is not recommended and may void OAKWORKS warranty.
