

IV Glove Strapless

Pre-application: Clean the site per hospital protocol, and ensure the site is dry before applying the

Instructions for use

Available for Pediatric and Adult patients

IV Glove

1. Follow standard IV insertion as per hospital protocol
2. Cover the insertion site with medical tape or Tegaderm
3. Open the transparent covered dome of the IV Glove by pulling up on the cover
4. Remove the plastic from the dual-sided adhesive strip on the bottom of the device
5. Place catheter tubing into patented S-Clip design and place the device on the patients hand, ensuring the dual-sided adhesive adheres to the skin to keep the device in place
6. Carefully close the protective dome, ensuring the pins 'click' in place
7. IV Glove is ready for use

Note: If desired, add medical tape around the device for additional securement

IV Glove Strapless

Instructions for use

Available for Pediatric and Adult patients

IV Glove

Assessment
-Follow hospital protocol for assessment
-Simply inspect through the transparent covered dome to ensure proper catheter placement (no redness, swelling, etc.)
-If further inspection is required, simply lift the transparent covered dome for closer inspection

Removal
1.Open the transparent covered dome and remove the tubing from the S-Clip
2.Loosen the arm straps by removing the pins from the holes
3.Slide the IV Glove off the patient's arm, taking care to mind the IV insertion site
4.Remove the medical tape or Tegaderm
5.Remove the IV catheter

Post-application
-IV Glove is made of 100% recyclable materials
-Dispose of the IV Glove per hospital protocol
