

# DIGIDOP SMART RECHARGE BASE

FOR DIGIDOP DOPPLER SYSTEMS

American-Made  
Quality

Includes labor, parts,  
and accidental  
breakage

## ALWAYS BE READY

DigiDop Smart Recharge Base for Rechargeable Units

Smart  Recharge  
System

The Smart Recharge Base for DigiDop Dopplers offers a convenient solution for storing and charging your device. Featuring the Smart Recharge System, the base automatically stops charging your DigiDop once it's full, eliminating the risk of overcharging and ensuring a long-lasting battery life.

### Newman Medical History & Commitment

- **Decades of Experience:** The Newman family has been a leading force in the Doppler industry and ultrasound diagnostics since the 1970s.
- **Innovation & Quality:** Newman Medical is dedicated to ongoing product development, bringing high-quality diagnostic tools to the market.
- **Exceptional Service:** They prioritize building long-term relationships with customers through a relentless focus on service.

### First-Class Support

- **Experienced Team:** Newman Medical boasts the industry's best customer service team, averaging over 25 years of experience.
- **Dedicated Representatives:** Their extensively trained field representatives are readily available to address physician needs.
- **Comprehensive Support:** Newman Medical offers both online and in-person clinical support options for physicians.

### Sustainability

- **Smart Recharge System™ (SRS):** This innovative system promotes sustainability by eliminating the need for disposable batteries.
- **Cost & Time Savings:** SRS saves time and money by reducing battery purchases and disposal.
- **Long-Lasting Batteries:** Rechargeable batteries hold a charge for years and can be recharged over 2,000 times.

FOR DIGIDOP DOPPLER SYSTEMS

## The DigiDop PRODUCT FAMILY

### DigiDop "Classic"

- Standard size
- Longer battery life than similar competitor products

### DigiDop II

- Smaller size
- Ergonomic - fits comfortably in your hand
- Similar battery life to competitor products

### DigiDop 901 Tabletop

- Ideal for hospital use
- Great room-filling sound from two speakers on top
- Two probe cradles
- Standard drop-on charging pyramid
- Optional wall mount recharger

## 4 REASONS TO SWITCH TO A DigiDop Smart Recharge System

### 01

#### Always Be Ready

Using the recharging base after use ensures the Doppler is always going to be ready and waiting for you the next time you need it.

### 02

#### Save Time & Money

Rechargeable batteries eliminate the need for so many repeat purchases and trips to the store. You just recharge your batteries at the end of the day.

### 03

#### Conserve Resources

Because rechargeable batteries can be used over and over, far fewer need to be manufactured and transported than when using single-use disposable batteries.

### 04

#### Environmentally Friendly

Rechargeables are highly effective in reducing your carbon footprint, as one rechargeable battery can replace thousands of single-use batteries, which would all end up in a landfill after use.

For added convenience, the DigiDop can be purchased with a Smart Recharge System. This intelligent system specifically charges rechargeable batteries without the risk of overcharging, ensuring a long lifespan for your DigiDop's power source.

Charging is simple: just plug the AC adapter into the designated recharge port on the unit. To achieve a full charge, it's recommended to leave the DigiDop plugged in for 3-6 hours. However, if you need a quick boost for immediate use, a 15-minute charge with the AC adapter will suffice.

And don't worry about forgetting to unplug the DigiDop - leaving it connected while not in use won't damage the batteries.
