

Camera

SmartCam

Making a Practitioners Case Documentation More Efficient.

An autofocus 4K camera for treatment/overhead lights. Burton's SmartCam is specifically designed for lighting mounting. The fast focus and pristine image quality with a Sony IMX415 sensor allows for even easier operation. The SmartCam is a great choice for high level documentation, communication, and live streaming for communication and educational cases.

burton®

Features

- Take Pictures Hands Free and with no Interruption to your Procedure
- Stable Images and Easy to Use (Portable)
- 4K Autofocus Camera

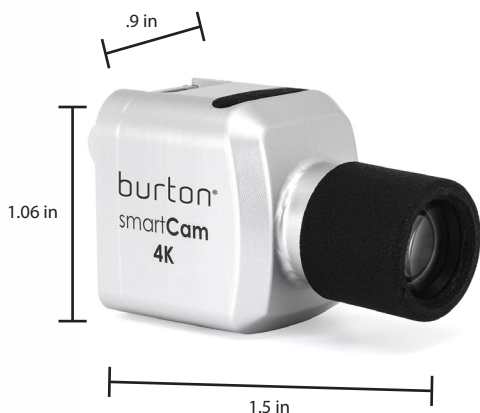

Software

The recording software offers an enhanced and seamless workflow for recording non-obstructed points-of-view videos and still images that can be shown live on a screen in the OR to enhance the documentation of procedures and communication.

With our solution the operatory point of view can be easily shared with the operating team, giving them firsthand sight of the operation. The cameras are USB-connected to ensure continuous operation and recording for the whole procedure and connects to normal medical PCs.
