

ARCTIKO INT SUF 100

true cooling specialists

-40°/-86°C

LOW TEMPERATURE CHEST FREEZER I

STORES YOUR SAMPLES UNDER OPTIMAL CONDITIONS

The single compressor technology provides reliable low temperature freezing and high temperature uniformity.

► SUPERIOR COOLING PERFORMANCE

Reaching -80°C in only 85 minutes due to our single compressor technology. The technology is specially designed to be the best in class in cooling performance.

With the SUF 100 freezer you are secured superior temperature stability and great temperature uniformity even after door openings. It also helps provide a stable cooling performance while lowering the energy consumption.

► OPTIMIZED STORAGE CAPACITY

The freezer has optimized internal storage for the best overlook. With the standard included stackable basket and the optional stainless steel front rack storage system the samples will be easy accessible at any time.

The freezer also has a premade access port with no extra cost involved, making it easier to monitor or inspect the unit with external probes.

► FILTERLESS CONSTRUCTION

Our filterless construction makes cleaning unnecessary. The evaporator coils are spaced so far apart that dust will not be trapped and obstruct the airflow.

The filterless construction eliminates the need for filters entirely, saving you maintenance time and cost.
