✔ Trendelenburg Guard

Provides a definitive stop barrier without nerve compression or obstruction.

StopGuard™: DSC-SG24-2P
Replacement Pads: DSC-SG24-2P-PAD

SECONDARY SAFETY SUPPORT

Patient safety is at the forefront with this secondary safety support system. Designed for planned & unplanned tilt procedures, as well as a stop guard for limb drop.

The ability to use just the shortest piece increases the versatility of the multi-tiered StopGuard™ component system, allowing for one short guard, one regular guard, and the ability to stack them together for an extra-large option.
