

BASICBilly+ CPR Feedback:

- Compression depth
- Compression rate
- Chest complete release (recoil)
- Appropriate ventilation volume
- Hands-off time

CPR TRAINING BASICBilly+

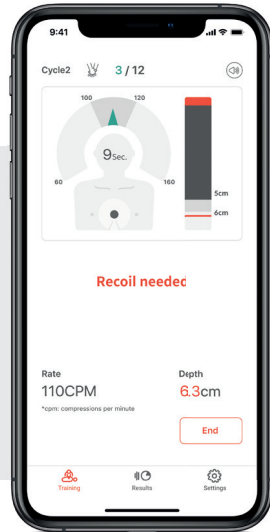

The new Basic Life Support manikin BASICBilly+ now comes with a **direct CPR feedback Upgrade Kit** which enables students and instructors to effectively train CPR with the free, accurate and user friendly mobile apps powered by **heartisense®**.

This high quality and economical **AHA compliant manikin** is a complete solution to train, monitor, analyse and debrief CPR performance. The manikin connects with the app using a strong and reliable **Bluetooth connection** – no need to set up a wireless network.

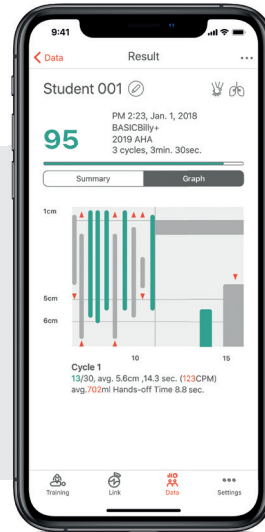

The Instructor App provides a **detailed performance review of up to 6 manikins at a time** while the Student App enables trainees to directly see and monitor their CPR performance.

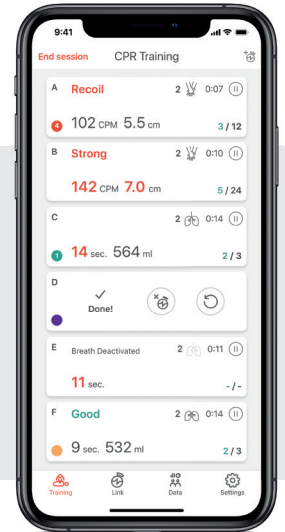

THE ECONOMICAL AND RELIABLE CPR TRAINING MANIKIN: AHA COMPLIANT WITH DIRECT FEEDBACK

*Intuitive **Student Feedback App** monitors and analyses performance improvement*

Student's results can be saved and offer a complete debriefing functionality

Instructor App to monitor up to 6 students at a time

CPR App Features (with Upgrade Kit):

- Offers overall scoring and point of improvement during CPR
- Direct (real-time) and summative CPR feedback for students
- Saved student results for review
- Export or share students result/certificate as a PDF file
- Instructor view can monitor up to 6 manikins at a time
- Instructor can use CPR analysis for detailed debriefing
- Easily switch from conventional CPR training to "compression only" CPR settings
