

# EASY STICK

IV SECUREMENT IN MANY LOCATIONS

IV  
GLOVE

**Reduce medical complications & protect** against **impact** and **accidental dislodgment**. This new device has additional **dual-sided foam padded adhesive** on the base of the **device** that can adhere **anywhere!**

## STRONGER ADHESIVE BY 25%

Built with our enhanced adhesive, the Easy Stick allows for improved hold and stability, even in the most demanding clinical environments. Whether in high-movement areas or clinical situations where durability is key, this feature minimises the risk of dislodgement, ensuring consistent securement over extended periods.

## LARGER SURFACE AREA

Designed with an expanded adhesive surface, Easy Stick offers greater coverage, distributing pressure more evenly and ensuring a more secure hold. This increases its efficiency and also makes it highly versatile for different patient needs and body types, providing added confidence for difficult-to-manage patients for nurses and clinicians.

## OPTIMIZED FIT FOR SECUREMENT

Whether you are securing lines in challenging tactical environments, pediatric care, or standard hospital settings, Easy Stick's flexible design ensures a comfortable fit. It accommodates various catheter types and IV setups, offering healthcare providers peace of mind that their lines will remain safely secured.
