

DELUXE MOBILE LEAD APRON LOCKER

PRODUCT INFORMATION

PRODUCT INFORMATION

DELUXE MOBILE LEAD APRON LOCKER | RAR-MLOCKERS5

The Phillips Deluxe Mobile Lead Apron Locker is engineered for hospitals and imaging facilities that require secure, organized, and professional storage for their radiation protective garments. Designed to hold up to 5 lead or lead-free aprons, this premium mobile locker ensures every garment is stored safely, cleanly, and ready for use—no more cluttered hooks, missing aprons, or damaged material from improper storage.

Built on a durable aluminum frame, the Deluxe Mobile Locker is lightweight yet exceptionally sturdy, making it ideal for busy environments such as the Operating Room, Cath Lab, Interventional Radiology, and Imaging Departments. The exterior is smooth and easy to disinfect, supporting infection control protocols while maintaining a clean, professional appearance.

For security, the locker features a digital locking system, allowing departments to control access and protect valuable radiation PPE. Inside, it includes five heavy-duty apron hangers, designed to keep garments hanging properly without creasing, folding, or stressing the core material.

Equipped with four premium locking casters, the locker glides smoothly across the floor and locks firmly into place once positioned. Whether you need to transport aprons between rooms or simply want a secure, centralized storage solution, this mobile system delivers unmatched convenience and reliability.

With an overall size of 71"H x 17"w x 26.5" D, the locker offers an efficient footprint that fits comfortably into clinical spaces while still providing ample storage capacity.
