

NextGen TERi™ & DANI™

<p>Addresses Training Needs/ Curriculum</p>	<p>NextGen TERi™ & DANI™ prepare learners for real-world patient care with training solutions that evolve from essential skills to advanced clinical procedures. From basic patient care and vital signs to airway management, ultrasound, and defibrillation, each tier supports critical curriculum needs. The immersive tier takes learning further with interactive, team-based scenarios that bring patient care to life.</p>

Additional part numbers shipped without hardware listed separately. Compatible with multiple projector setups to enable room-size immersive simulations (projectors sold separately).</p>

NextGen TERi™ & DANI™

A scalable patient care simulation platform designed to support healthcare education from essential nursing skills to immersive clinical simulation.

Be READY for NextGen Patient Care

Preparing Healthcare Professionals for NextGen Patient Care

Introducing **NextGen TERi™ and DANI™**, a scalable patient care simulation platform designed to support healthcare education from essential nursing skills to immersive clinical simulation.

With configurable tiers ranging from Essential and Plus through Pro and the Immersive Experience, programs can evolve alongside their curriculum and training goals.

This modular approach allows institutions to start with foundational patient care training and expand into advanced diagnostics, monitoring, and immersive scenario-based learning using the same core patient platform.

Why Choose TERi & DANI?

- **Customizable for Every Program:** Tailor TERi™ and DANI™ to fit your specific curriculum and competency requirements.

- **Realism That Engages:**
 - **TERi™:** Emulates an elderly patient's anatomy with features like wrinkles, blood vessels, and realistic oral and airway structures for geriatric care.
 - **DANI™:** Represents an adult patient with the same comprehensive anatomical realism, ideal for general adult nursing education.

- **Comprehensive Learning & Training:** Simulate over 23 patient care operations, including patient positioning, pericare, wound care, CPR and more.

- **Innovative Technology:** Immersive scenarios within a synchronized virtual environment, with real-time performance monitoring, support dynamic training.

Empowering NextGen Patient Care Skills

Customizable Solutions

- Choose the TERi™ or DANI™ with the features and functionalities to meet the unique requirements of your curriculum.
- Provide learners with tools that support personalized, patient-centric care.

Curriculum Integration

- Align simulations with specific learning objectives and educational standards.
- Build or customize scenarios to reflect the demands of modern patient care.

Competency Development

- Focus on the integration of technical and soft skills, such as inter professional communication, critical thinking, and decision making.
- Track learner performance with real-time feedback and data-driven evaluations.

Advanced Simulation & Immersive Training

The NextGen TERi™ & DANi™ Immersive Experience go beyond traditional simulation with a fully immersive patient care experience.

Haptic Feedback for Realism – Feel and interact with the environment just like in real-life scenarios.

Touchscreen Control – Easily navigate simulations for a seamless learning experience.

Designed for Team-Based Learning – Foster collaboration and prepare for real-world, multi-disciplinary care settings.

Train with confidence. Be READY for the future of patient care.

Clinical Diagnostics & Assessment

- Wireless auscultation for heart, lung, and bowel sounds
- Training for percussion, palpation, and injections
- Ultrasound guidance for selected procedures such as IV access
- Diagnostic training integrated into clinical scenarios

Key Features

Advanced Patient Monitoring

- Real-time ECG, SpO2, blood pressure, and more.
- Simulated patient monitor with portable design and real clinical interface.

Immersive Scenarios

- Create and save custom scenarios to fit your curriculum.
- Monitor performance and provide feedback through a synchronized virtual environment.
- Initial preset scenarios included and more scenarios coming.

Comprehensive Skills Training

- Perform tracheostomy care, wound dressing, catheterization, CPR, and more.
- Use simulated tools for defibrillation, ultrasound, and blood gas analysis.
