GENERAL BUNDLE D FLARED EDGE COATED POSITIONERS

PPFP-KIT8

The General Bundle D Flared Edge Coated Positioners is a kit that brings together a selection of foam positioners for patient support and positioning during medical imaging procedures. Designed for general imaging environments, it includes head and neck supports, wedges, a wedge set, and a rectangle positioner for a range of positioning needs.

The General Bundle D includes **one of each** of the following:

- PPFP-PCAL – Head & Neck Flared Edge Coated Support
- PPFP-PCAN – Child Flared Edge Coated Head Holder
- PPFP-PCAR – Cervical Flared Edge Coated Head Rest
- PPFP-PCBF – 27 Degree Flared Edge Coated Wedge
- PPFP-PCBJ – 12 Degree Flared Edge Coated Wedge Set
- PPFP-PCBL – Small 3" Flared Edge Coated Rectangle Positioner

For added durability, a medical-grade, fluid-resistant coating covers each foam positioner. The coating is easy to clean with medical-grade disinfectant wipes or sprays. It also helps protect the foam interior during repeated clinical use. In addition, the positioners are radiolucent, with low attenuation and minimal shadowing during imaging.

The patented N-VISI-RAY design features flared edges that help significantly reduce artifacts during X-ray imaging. Although the flared sides increase the overall size of the positioners, they do not affect imaging or positioning.

Finally, the positioners included in General Bundle D are MRI Safe and latex-free. This makes the kit suitable for use across a variety of medical imaging environments.

SPECIFICATIONS

SHIPPING WEIGHT: 112 oz

SHIPPING DIMENSIONS: 26 x 24 x 9 in

MATERIAL: Coated Foam

POSITIONER TYPE: X-Ray Positioning Sets

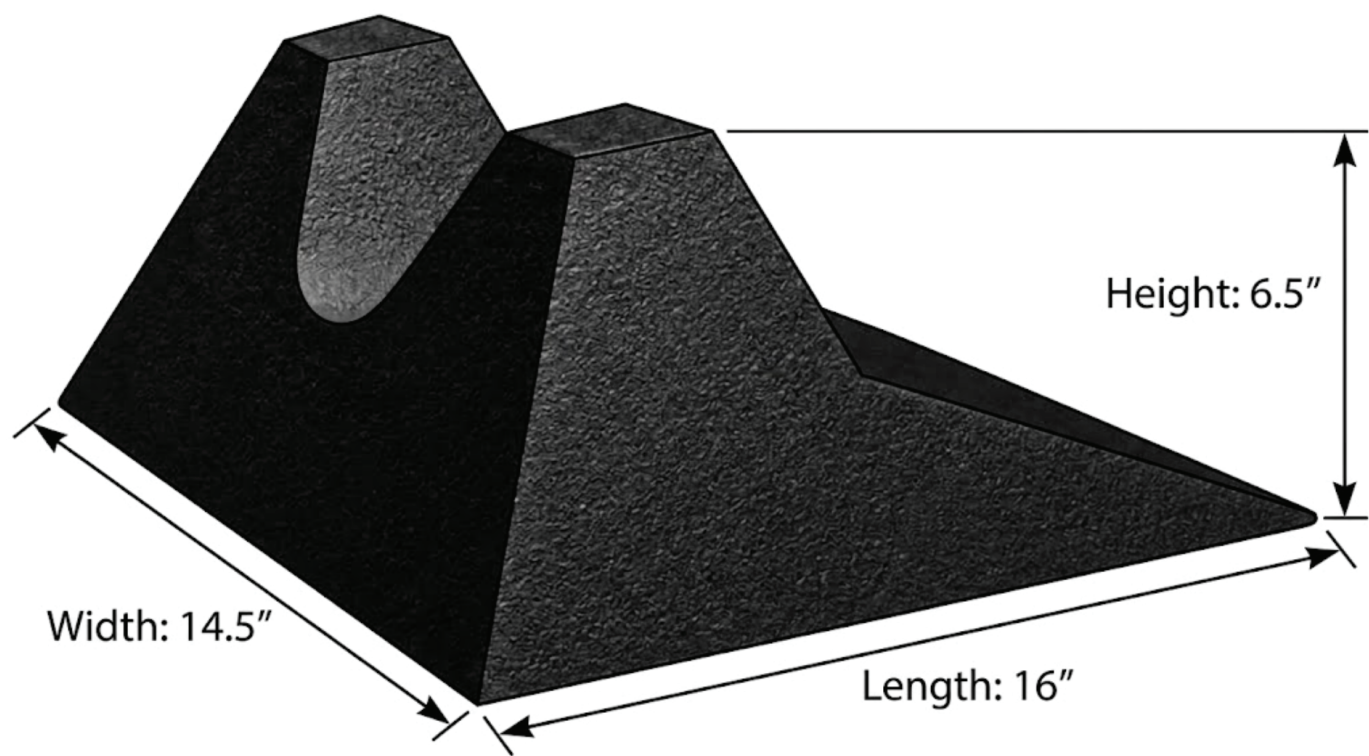

FEATURES: Flared Edge, MRI Safe, Latex-Free, Radiolucent, Low Attenuation, Easy to Clean
