MRI CT FULL BODY WRAP IMMOBILIZER

RA-BWI-12X24 | RA-BWI-20X36 | RA-BWI-24X52 | RA-BWI-26X68 | RA-BWI-60X66

The MRI CT Full Body Wrap Immobilizer helps keep patients securely positioned during MRI, CT scans, and other diagnostic imaging procedures. By limiting patient movement, this positioning aid supports accurate imaging results while providing a comfortable and stable fit throughout the examination.

The wrap features a soft, supportive construction made from durable, medical-grade blue vinyl. Its flexible design allows it to wrap around the patient's body, helping maintain proper positioning during scans. In addition, the material is easy to wipe down and clean between uses, making this reusable immobilizer a practical choice for busy radiology departments.

To accommodate different patient ages, body types, and positioning needs, the MRI CT Full Body Wrap Immobilizer is available in five sizes:

- Infant: 12″ × 24″
- Toddler: 20″ × 36″
- Child: 24″ × 52″
- Adult: 26″ × 68″
- Full Body: 60″ × 66″

With its range of sizes, durable construction, and easy-to-clean surface, this patient immobilization wrap offers a versatile solution for MRI, CT, and general diagnostic radiology applications.

SPECIFICATIONS

SHIPPING WEIGHT: Varies by size

SHIPPING DIMENSIONS: Varies by size

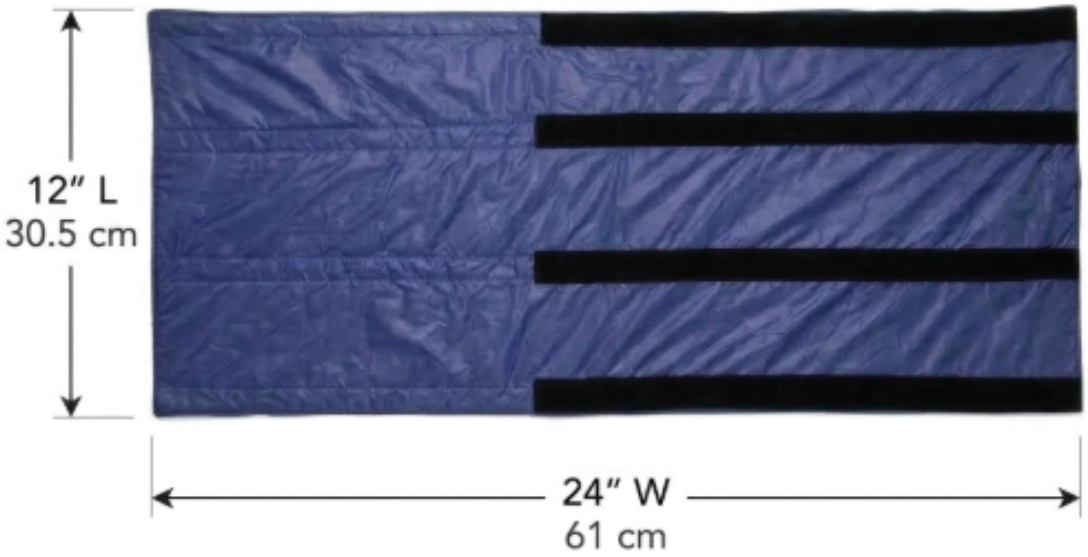

SIZE: Infant, Toddler, Full Body, Child, Adult
