Exact Volume Transfer Pipettes

Sterile Packages, an MTC Exclusive

- **Dual-bulb design ensures consistent volume delivery**
- **Manufactured from chemically resistant LDPE**
- **Minimal liquid retention**
- **Available in 10 capacities**
- **STERILE Resealable bags**

Designed for consistency and ease of use, MTC Bio Exact Volume Transfer Pipettes deliver repeatable liquid handling without the complexity of calibrated instruments. Engineered for clean release and dependable performance, they are ideal for routine lab workflows, molecular applications, and kit-based use where simplicity and reliability matter most.

Overdraw Bulb

Captures excess liquid to deliver consistent and replicable volumes

The upper bulb facilitates pipetting with a familiar pinch and release, while the lower overdraw bulb captures excess liquid. This extra sample is trapped in the overdraw bulb during release, ensuring that only the desired volume is dispensed in pipetting.
